

Curriculum Progression

	Lower Key Stage 2 Age 7-9	Upper Key Stage 2 Age 9-11	Key Stage 3 Age 11-14	Key Stage 4 Age 14-16	Key Stage 5 Age 16-19
Subjects taught	<p>Pupils have a core timetable of 10 lessons of Numeracy and Literacy each week.</p> <p>Other subjects include Science, Modern Foreign Languages, Art, Design & Technology, Music and Humanities.</p> <p>Lessons are focussed on the child's learning needs and on developing their attention span and technical competence.</p> <p>IT competency is developed as a necessity in lessons.</p> <p>Students have twice weekly tutorials to provide pastoral support and to guide their learning.</p>	<p>The timetable consists of 20 lessons each week where pupils follow a core curriculum of Maths, English and Science. In addition History, Geography and Modern Foreign languages are introduced. The students also have a creative curriculum which includes Art, Design and Technology and Music. PSHE supports the students' understanding of the world. Students also undertake an independent project module with guidance on the choice of topic.</p> <p>IT skills underscore all subjects, explicit computing and coding lessons are introduced from year 5.</p> <p>A core tutorial programme, taking place twice weekly, runs throughout the year to guide learning and to provide pastoral support.</p>	<p>Students have 20 lessons each week, including a core of Maths, English Language and Literature, Physics, Chemistry and Biology.</p> <p>Foundation subjects include: History, Geography, the opportunity to study two modern foreign languages, creative arts including Art and Music. IT and Computing competence underpins all the learning. Students may also take an optional class in Coding. PSHE supports personal development and understanding the world at large. Students are supported in the choice of study for their own project.</p> <p>The curriculum is more formalised at this point but all subject content is delivered in a supportive way.</p> <p>Students have a 30 minute group tutorial as well as a 20 minute individual tutorial to guide learning and to provide pastoral support.</p>	<p>Students will follow a timetable of 20 lessons each week, however, the proportion allocated to each subject may change as they go through Key Stage 4 dependent on the relative focus of external examinations being followed. Students choose 8-11 GCSEs, including Maths, English Language, English Literature, Sciences, and one Modern Foreign Language. Students choose up to a further 4 GCSEs from a range of subjects including: History, Geography, a 2nd Modern Foreign Language, IT & Computing, Creative Arts such as Art and Music.</p> <p>PSHE remains an important part of the curriculum too. Students are supported in determining whether they are considered for early entry GCSE or equivalent.</p> <p>A core tutorial programme, consisting of a 30 minute group session followed by a 20 minute individual discussion, runs throughout the year to guide learning and to provide pastoral support.</p>	<p>Students choose to study A-Level subjects appropriate to their aspirations. A-level study would involve 5 contact hours per week, in each subject.</p> <p>Students are also offered the opportunity to study an EPQ (Extended Project Qualification), or a Special Interest Option subject.</p> <p>There is a core of PSHE studies that runs within the tutorial system designed to prepare students for adulthood, together with a programme of careers education and preparation for university or apprenticeship application, where applicable.</p> <p>The group tutorial system will allow for support of learning and pastoral guidance along with a focus on future aspirations to higher education or the workplace.</p>

Curriculum Progression

Skills development	<p>Students will become familiar in the use of IT and the OEO learning platform. Communication skills both spoken and written will be central to the learning experience. Skills in numeracy and literacy will be developed, to enable independence.</p>	<p>Students begin to apply the literacy and numeracy skills that they have learned explicitly in lessons and in the research and production of their project. Students' communication skills will become more developed, their vocabulary will be broadening and their confidence in presenting information will be more sophisticated. Their ability to use their IT skills to produce simple PowerPoints and written work starts to develop.</p>	<p>Students start to become more reflective of their learning and develop their analytical skills. They will use more complex communication skills in writing and speaking. They are guided to research independently, to select and to collate information in appropriate formats. Information will be presented in a number of different ways, and students will begin to set their own parameters for research and to express opinions about the structure of their personal project.</p>	<p>Students are guided in applying the cumulative skills learned during KS3. They are encouraged to research material independently, to support their knowledge base, enabling them to formulate original ideas and to evidence their hypotheses. Embedded IT skills will be used to evidence material studied. Students will be supported in developing specific strategies to deal with external examinations. They will also start to become reflective learners, who recognise the skills that they are applying to their work.</p>	<p>Building on the broad range of skills gained in KS4, students will be encouraged to deepen their knowledge, extend their research base, to analyse material and to develop their own hypotheses and arguments, in response to questions. It's important that their focus is on demonstrating their understanding, and conclusions, through evidencing their opinions and presenting objective arguments. They develop skills in perception, the complexity of argument and ability to express their ideas using broad and sophisticated vocabulary and phraseology. They will be supported in strategic skills development with regard to specific examination courses, matched with their future aspirations.</p>
Length of lessons	<p>Lessons will be 30-40 minutes long depending on what is best for the child.</p>	<p>Lessons are generally of 40 minute duration and may be one to one or shared with up to 4 other pupils.</p>	<p>Lessons are 40 minutes long and may be one to one or shared with up to 4 other students.</p>	<p>Lessons are 50 minutes long, although students may have double lessons in order to reflect the depth of study. Depending on the subjects being followed, students may be in one to one classes or may have shared lessons with up to six other students.</p>	<p>Students should expect lessons of a longer duration to support the depth of study, these may be of 60 minutes or more and a minimum of four contact lessons per week, according to the subject being studied. Students are expected to undertake a</p>

Curriculum Progression

					significant amount of personal study in addition to their contact classes.
Homework	Children are expected to do some reading and spelling as indicated by their teacher.	Students will receive 20 minutes of homework, per subject, each week. Study time is built into the timetable as is the opportunity for some music practice. It is expected that pupils will read every day as a secured learning habit and interest.	Students will receive 30 minutes of homework, per subject, each week. Some of this study time is built into the timetable, students are expected to use some independent time for homework too. Reading is expected as a secured learning habit and interest.	Students will receive 60 minutes of homework, per subject, each week, most of which will be outside the timetabled lesson programme. It is expected that students maintain an interest in reading to support their learning as well as being an interest. Revision for external examinations will be structured into homework too.	Students should expect at least 4 hours homework per subject studied. Personal study is vital in the completion of qualifications at KS5.
Self-study	We actively encourage independent reading. Book lists can be provided and we can offer the option of ordering books for parents. It is important that young learners are reading for pleasure too as a means to support language acquisition and learning.	Reading is integral to the learning process so it is expected that pupils will read on a very regular basis. Booklists are provided as guidance and there is the option to order books through OEO. We encourage pupils to develop other skills to support their learning e.g. touch-typing or coding as well as more traditional 'hobbies' such as music and sports.	Reading is central to the curriculum and students are expected to expand their reading sources at this age, this may involve focussing on non-fiction texts too. Booklists are provided as guidance and there is the option to order books through OEO. Students may want to extend their self-study for instance by researching their own project more extensively and by developing their personal skills and interest base.	Students are expected to be reading regularly, fiction and non-fiction, as well as to be doing further research to support their studies in an independent manner. This will help them to formulate a direction for their further study and focus at KS5. Students are also encouraged to pursue other interests, such as sports, as a means to ensuring a healthy learning journey.	Students should keep their general knowledge up to date and be aware of what is happening around the world. They will be expected to research their options for future study or work and to be considering their options carefully. It is expected that students maintain an interest in reading and other hobbies such as sport or music to support them in their learning journey and to provide alternative activities at this important time.
Assessments	Within the first week of term or at the start of the child's course we will carry out a reading age	Reading age and other assessments will be carried out in the first week of joining OEO or at the beginning of the	Reading age and other assessments will be carried out in the first week of joining OEO or at the beginning of the	Students may take some formal external qualifications allied to the UK curriculum at	Students may be asked to take an assessment on joining the KS5 programme to determine their levels and the

Half-termly reports are provided in the interim by the tutor to high-light how the child is getting on. Reports will help to inform the educational structure that a student will follow in Key Stage 4 and to map the route to formal GCSE or similar external examinations.	progress. Half-termly reports are provided in the interim by the tutor to highlight how the student is getting on. Reports, performance and interests will help to inform and plan the route to be followed at KS5.	final report as well as at half termly points. Reports and performance will inform the support for further study and moves to the workplace on completing KS5.
Communication	Children have twice weekly tutorials with a named member of staff (tutor), this is to check on learning and well-being. Parents receive a weekly newsletter and update via the tutor where a child is on the full-time programme. Parents' evenings are held in February.	Twice weekly tutorials allow the student to discuss their progress with their tutor. The tutor sends out weekly feedback updates to parents and carers. Parents' evenings are held in February.	Twice weekly tutorials allow reflection on progress and discussion of learning with the tutor. The tutor sends out weekly feedback updates to parents and carers. Parents' evenings are held in February.	The tutor sends weekly updates to parents and carers and parents' evenings are held in February. Students are able to discuss their progress weekly with the tutor in bi-weekly tutorials, one being a group tutorial, the other being a one to one discussion.	The tutor sends weekly updates to parents and carers. Parents' evenings are held in February. Students are able to discuss their progress with their tutor in tutorials to ensure that learning is progressive and that they are supported in their future choices.
Tutorial frequency	Tutorials are held twice a week for pupils who are on the full-time programme. They can access support in their learning as well as technical support.	Pupils have two tutorials a week, one is a shared 30 minute session and a shorter 20 minute individual tutorial offers opportunities for reflection of the week's learning.	One 30 minute tutorial is shared with peers and the another of 20 minutes duration is one to one. Over time the pupils will start to develop the confidence to think about their learning independently.	One group tutorial and a second one to one tutorial will enable students to reflect on their learning journey. They will also be able to use this to broaden their range of study skills to ease learning over the qualification phase.	Students will have one group tutorial per week and a 20 minute one to one tutorial. Discussions will focus on supporting learning, ensuring the student is achieving the appropriate landmarks as well as pastoral support and discussion of future aspirations and PSHE.
Class size	Pupils are taught in small groups of 1-3 students. They will work closely with a teacher who will	Teaching groups are based on small groups of 1-4 students. It is important that they have the opportunity to ask	Pupils are taught in groups of 3-5, with the possibility of slightly larger groups in PSHE and tutorials. This is a	Students are taught in groups of 4-6, sometimes smaller depending on the subject being studied. Curriculum Progression

	guide them in the learning that they cover and will anticipate how much support they need.	questions and be involved in all their learning including a reflection of their learning journey.	reflection of the developing ability to learn to work with others and increasing independence.	groups can be expected in PSHE and the group tutorial.	groups can be expected in PSHE and the group tutorial.
Independence in learning	Parent / carer will need to be in close proximity to support with technical and potential learning support. Over time we anticipate the level of dependence will reduce but the adult will still need to be close by for safeguarding too.	Whilst a child at this stage may not need a parent to be in such close proximity when they are in lessons, it is important that they are available should there be any technical or other issues and so that the teacher can call on the adult if required. It also helps us to ensure a level of safeguarding.	Students at KS3 may well be able to work relatively independently and be able to cope with some technical problem-solving, however, it is important that a parent / carer is available so that the teacher can call on the adult if required and to meet our shared safeguarding responsibilities.	By KS4 students have made choices in their learning and may be following staged external examination courses. It is expected that they are involved in discussions around their learning route so that they exert a level of ownership that encourages further independence in study.	It is expected that pupils who are at KS5 will be pursuing a significant amount of independent study to support their learning and to research their future aspirations. They will be supported in this where required to ensure that they are strategic in their choices.
Induction & taster lessons	Children will be encouraged to join a series of taster sessions to encourage them to understand the way that learning online with OEO works. This might be an individual lesson, followed by joining other pupils in their classes to demonstrate the social aspects of our learning model and to further develop their skills in using the platform.	Children will be offered an induction of taster sessions when they join OEO. It is really vital that they feel comfortable in the new learning environment and are able to 'practise' using the platform prior to fully committing to the courses. It also enables prospective students to familiarise themselves with the requirements of working on the platform.	On joining OEO, students will be offered an induction of taster sessions to help assimilate to the learning environment and to become familiar with technical access to lessons. This is important to allow prospective students to become familiar with the requirements of working on the platform.	When students join OEO at the transition from KS3 it is really important that they participate in an induction of taster sessions to enable them to adapt quickly to the online learning environment. Teachers will support them with the technical access, as well as in supporting the more independent nature of studying online. This is important to ensure students can access learning quickly and effectively.	When students join OEO, they will be invited to participate in an induction of taster sessions to enable them to quickly adapt to learning online. Teachers will support them in the technical aspects of working on the platform as well as preparing them for study at this higher level. Students will be supported to become independent learners.
